(a)
1.44 : 1 ($b = 0.17$)
1 : 1
observed half-period
predicted half-period
$b = 0.15$
$b = 0.16$
$b = 0.17$, small
$b = 0.17$, large
$b = 0.18$
(b)
predicted / observed frequency
ring diameter $2R_m/\lambda$
Barkley (as in a)
weak $m = 2$
Panfilov–Rudenko
Atri
frequency ratio
after Eq. (5)
